

## **Manlift Ticket Phoenix**

Manlift Ticket Phoenix - The Manlifts and Elevated Platforms course offers training on the regulations, rules and proper application of safe operating procedures and work practices included in everyday activities for those who work using this machinery. The program has been designed for individuals who are actively involved in these activities or individuals who have a basic knowledge of this machinery.

Aerial platforms and manlifts have become integral and common machines in industrial settings in the past few decades. These machinery provide an easy way to lift staff near what must be done on a stable platform apparatus, allowing employees to perform tasks with greater safety and comfort rather than being perched on top of scaffolding or ladders.

Similar to every other device, manlifts are only safe when they are utilized correctly. Since they lift workers above floor or ground level, accidents could easily happen and this can result in serious fatalities or injuries for both the manlift operators as well as whoever passerby who might be unlucky enough to be standing below.

There are different kinds of manlifts. Most fall into 1 of 2 categories: the articulating boom lift, which has the capability of both horizontal and vertical movement and the scissors lift, that is capable of moving up and down.
