

Order Picker License Phoenix

Order Picker License Phoenix - Order picking is otherwise called order preparation operation. This is one of the key processes in a warehouse and consists of people known as order pickers, collecting and taking articles in a particular quantity before shipment so as to accomplish customer orders. Order picking is a basic warehousing process. The efficiency in which this job is done could be directly related to a supply chain's productivity. Thus, order picking is one of the most controlled logistic methods. Order picking falls in the category of the warehouse management system.

There are particular types of order picking which include: pick to box method, wave picking method, picker to part method or piece picking, sorting systems method and zone picking method.

The pick to box method involves the order picker only filling the boxes with stuff that are from their specific station. The box then moves on to other stations to until the order is finish. In this technique, there is no movement of the order picker employees. In the wave picking method, the order pickers move round to be able to collect the needed items for several orders. The piece picking or picker to part method is similar where the order picker or pickers move to be able to collect the items needed but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are brought to the orderpicker by an automatic system like for example an automatic storage system or a conveyor system. In the zone picking method, every order picker is assigned to one particular zone. They are responsible for just realizing order picking within this specific area.
